

Telesis® The leader in direct part marking. Our wide range of **LASER, PINSTAMP®** and **TELESCRIBE®** Marking Systems are fast and durable. They are relied on in thousands of manufacturing facilities throughout the world. **Telesis®** systems whether Standard or Custom Engineered are designed to meet the most demanding customer requirements. www.telesis.com

TOX The market leader in **Air/Oil Cylinders** and **Electromechanical Drives**. Integrated, Stand Alone, Hand Held and Robotically Mounted. Applications include: Assembling, Press Fitting, Clinching, Fastener Insertion, Punching, Piercing, Coining, Riveting, Crimping and more. A complete line of Press Frames, Tooling, Controls and Monitoring. www.tox-us.com

**HOOSIER
FEEDER**

Hoosier Feeder Co. has the knowledge and experience to orient the most difficult parts in vibratory and centrifugal feeders. It is our objective to create the simplest system for the job. The creativity of our concept team allows us to offer unmatched reliability to the most complex feeding application. www.hoosierfeedercompany.com

Direct Conveyors Direct Conveyors is Dedicated to Providing Innovative, Cost-effective Solutions. Over 20 different Common Platforms Including: Low Profile - Steel/Cleated/Modular Plastic Belt, Palletized, Plastic and Metal Chain, Low Back Pressure Roller Chain, Indexing, Bi-Flow, Timing Belt Conveyors and more. www.directconveyors.com

Futek – Advanced Sensor Technology Load Cells, Torque Transducers, Pressure and Force Sensors. Robust sensors for Industrial, Medical, and Aerospace applications. Specialty and Multi-component Sensors, Displays, Amplifiers and Sensor Calibration. www.futek.com

Micro-Epsilon – The Authority in Displacement Measurement Laser – Single and Multi-point Scanners, Non-Contact IR Temperature, Inductive, LVDT, Eddy-Current, Capacitive and Draw-Wire sensors. Sensors for Gaging, Displacement, Distance, Vibration, Thickness and Temperature. www.micro-epsilon.com

GVI Ventures Our Innovative, **Cost Effective** and **Scalable** Ether-Inspect GigE Vision Solution is replacing Smart Camera systems globally. **Pre-configured Application Templates:** barcode identification, inspect parts, inspect colors, sort product, bead inspection, snap ring verification and case pack inspection among others. Manufacturers of all sizes can now Realize the **Cost Cutting** and **Quality Improving** benefits of Machine Vision by installing Ether-Inspect.. www.gviventures.com

Sciometric – Factory Floor Test Systems & Birth History Data Management Systems Wide Range of Standard Test Templates both Affordable and Scalable. Applications such as Press Monitoring, Leak, Torque and Vibration (NVH) Testing, Weld Monitoring and many more. www.sciometric.com
